

Team Involvement in Demonstration

Date	05 July 2026
Team ID	SWTID-2026-5245
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles of each team member during the project demonstration. It ensures that every member contributes meaningfully to the presentation and that responsibilities are distributed fairly and clearly.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	Ponnappareddy Pradeep	Team Lead & ML Developer	Problem Statement & Model Overview	Led the team, defined the problem statement, and explained the crop recommendation model, dataset, and algorithm used for training.	Active
2	Karthik Puli	Backend Developer	Flask API & Prediction Logic	Built the Flask backend that loads the trained model and label encoder and processes prediction requests.	Active
3	Suripaku Santhosh	Deployment Engineer	Deployment & Hosting Walkthrough	Configured the Vercel deployment setup (vercel.json, serverless routing) and explained the hosting architecture.	Active
4	Shiva Mallesh	Frontend Developer	UI Walkthrough & Live Demo	Designed the input form (index.html) and ran the live demo, entering soil and climate values to show predictions.	Active
5	Sirivela Lokesh Babu	Testing & Documentation Lead	Testing & Results Analysis	Tested prediction accuracy across sample inputs and prepared supporting documentation for the demo.	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Ponnappareddy Pradeep
Overall Team Coordination Rating (1-5)	5
Any issues during demo	A brief delay occurred during the live prediction due to the serverless function's cold start while loading the model.
How issues were resolved	The team pre-warmed the deployed app just before the session and kept sample inputs ready, ensuring the live demo ran smoothly.
