

Project Demo Planning

Date	27 June 2026
Team ID	SWTID-2026-5245
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Problem & Solution	One-line problem statement (farmers lack a data-driven way to pick the right crop) and one-line solution (OptiCrop: ML-based crop recommendation engine).	0.5	Ponnappareddy Pradeep
2	Live Demo: Data Entry & Recommendation	On the live app (https://opticrop-indol.vercel.app/), enter sample N, P, K, pH, temperature, humidity, and rainfall values, submit, and show the recommended crop with confidence score.	1.5–2	Karthik Puli
3	Tech Stack & Deployment	One line: "Built with Flask and a scikit-learn ML model, deployed live on Vercel."	0.5	Suripaku Santhosh
4	Closing & Future Scope	One line on what's next (crop suitability check, researcher dashboard) and thank the audience. Cut to a single sentence if time is tight.	0.5	Shiva Mallesh

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	One sentence only: farmers struggle to pick the right crop without a reliable, data-driven method
2	Solution Overview	Describe the project architecture, technologies, and Workflow
3	Live Feature Demonstration	The core of the demo. Enter soil/climate values on the live Vercel deployment, submit, and show the recommended crop with confidence score.
4	Q&A Session	Answer questions, discuss future enhancements, and conclude the demonstration.
