

Brainstorming & Idea Prioritization Template

Date	27 June 2026
Team ID	SWTID-2026-5245
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Ponnappareddy Pradeep	Recommend the best crop to grow using N, P, K, temperature, humidity, pH and rainfall data via an ML model	Core Feature	1
2	Karthik Puli	Allow users to check whether a chosen crop is suitable for their current soil and climate readings	Core Feature	1
3	Suripaku Santhosh	Build a dashboard for researchers/policymakers to visualize crop-environment patterns across regions	Analytics & Reporting	2
4	Shiva Mallesh	Add a mobile-friendly web interface so farmers can enter values easily and get instant recommendations	UI/UX	3
5	Sirivela Lokesh Babu	Deploy the trained model as a web application with a simple form-based input and prediction output	Deployment	1
6				

Brainstorming & Idea Prioritization Template

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML-based crop recommendation engine using N, P, K, temperature, humidity, pH and rainfall	High	High	1	Yes
2	Fertilizer/resource efficiency suggestions and analytics dashboard for researchers	Medium	High	2	Yes
3	Mobile-friendly UI enhancements for farmer input	Medium	Medium	3	No
